Welcome to the Final Fantasy X Any% Speedrun Notes. These notes are the work of a lot of very amazing people who have helped me compile everything here into one document.

Some beginning information about the run:

- You should be able to complete the first run that you do, as long as you follow the notes exactly. Misreading them can lead to runs that cannot complete. Don't try to do something else because you think it will also work, unless you've tried it before. Examples of this include using Marbles instead of Gems on Biran and Yenke - even though Marbles will still kill, you won't get the overkill which gives us required drops. Information about WHY we do these things are not present in these notes, as they are outside the scope of this document, but if you ask someone will definitely be able to tell you.
- Common mistakes usually end up being gridding mistakes - some of these are unrecoverable. It sucks, it happens, just realize for next time and double check your grids before doing anything.
- The run is very long. Make sure you have all the supplies you need.
- Blitzball sucks. If you lose, it's awful, but the run is still very completable, only loses about 1-2 minutes. Don't worry about it too much.
- Have fun!

Some information about how these notes are laid out:

- There are a few acronyms used throughout the run.
 - **SD: Skip Dialogue.** During some cutscenes, some of the dialogue is skippable. As soon as the text finishes appearing on the screen, you can hit **Confirm** to cause it to disappear. This will stop the Voice Over lines from completing, causing the cutscene to progress faster. As a result, you can mash during this to progress faster.
 - **CS: Cutscene.** In game rendered cutscene. Can't do anything about it, just take a break. Usually they will have the approximate time that the cutscenes take, so you can plan your breaks better. These are timed for PS2.
 - **FMV:** Full Motion Video. Pre-rendered cutscene. Can't do anything about it (usually), just take a break. Usually they will have the approximate time that the cutscenes take, so you can plan your breaks better. These are timed for PS2.
 - **Skippable FMV: Skippable Full Motion Video.** Pre-rendered cutscene, but you can skip these if you are on PC. They still have times, because these are not skippable on PS2.
 - **Touch the Save Sphere:** Touching Save Spheres will full heal you. Touch the save sphere, and then cancel out.
- Read each page as such: Left column, then right column, then the next page. There are some instances Read the columns left column first, then right column, then next page. There are some instances where there will be an instruction box that takes up both columns - in this case, do whatever is above the instruction box first (left column, then right column), then do whatever is below the instruction box the same way (left column, then right column)
- Each bullet point is their own item. Do what it says there before going to the next one.
- There are instances where you have to get an item, or overdrive, etc before progressing. If the notes say to do so... **Do So.** These notes don't contain many backup strats.

Some information about Spheres:

- The sphere grid route requires 47 Power Spheres. There are 37 Power Spheres that are guaranteed drops during the course of the run, so you need 10 "bonus" spheres in order to be able to complete the run. It will be stated which ones are guaranteed and which values are bonuses. Keep track of the bonuses in order to determine at the stated points if you're low and to do the backup strats then. The guaranteed power spheres are:
 - Tros - 2
 - Besaid Dingos - 2
 - Besaid Garuda - 1
 - Geneaux - 2
 - Sahagins - 17
 - Vouivre + Garuda - 2
 - Raldo - 1
 - Bunyip (Mix) - 2
 - Wendigo - 2
 - Bombs - 6
- The sphere grid route requires 17 Speed Spheres. For the most part it doesn't matter when you get them, but keep track of all the ones that you get dropped. There are points to get backup speed spheres that are stated throughout the run.
- These set of notes contain both the **Blitz Win** and **Blitz Loss** strategies. At various points, the strategies that you have to do are different depending on whether or not you won or lost blitzball.

EXTRACTOR - 4,000 HP

In this fight you need to apply Slow to extractor with Stunning Steel. You can check after each of Tidus' Attacks if Slow has been applied by looking at the turn order. If Slow has been applied Tidus and Wakka will get more than one turn each after some boss turns.

On Extractor's 3rd turn it will rise. After extractor falls back down it will always use Aqua shooter on it's next turn and then it will randomly choose between Aqua Shooter and Rise on subsequent turns. You need to deal 500 damage to Extractor once it has risen to force it back down and this is only possible with 4 Attacks, 2 from each of Wakka and Tidus. You need to make sure you always have 4 turns following a turn in which Extractor can rise, so you will need to pay attention to the turn order and use Switch Weapon, where necessary, to fix the turn order to make the fight safe.

- **Tidus**: Attack
- **Wakka**: Attack

The key to this fight is reducing Evrae's health until it is in the window [11460-11967]. Once Evrae is in the damage window you need to perform the killing combo blow but it needs to be well timed. You should try to get Evrae into this window before the second Poison Breath. If you fail to get Evrae into this window before the second Poison Breath it is best to tank another Poison Breath and defend for an extra cycle. Once you are confident with the fight you can judge whether you have the time to get her in the window after the Poison Breath.

There is a rare outcome where **Rikku's** Second Mix crits Evrae (9000+ Damage). Evrae will likely have overshoot the damage window and in rare cases Evrae may use haste here. If Evrae hastes then recovery is almost impossible and it is very likely game over. If Evrae is below the damage window do not damage her until next poison breath, Hi-Potion Auron and Phoenix Down Rikku if hit by Evrae.

- Switch **Tidus** for **Rikku**
